

ABSTRACT OF THE DISCLOSURE

A housing for receiving a flat panel display is disclosed, which can save time and cost for developing, assembling and disassembling the flat panel display and frames. The housing for receiving a flat panel display of the present invention includes: a front frame having a central opening,; a plurality of side frames to surround at least part of the edges of said flat panel display; a bottom frame to combine with said front frame, said side frames to form a space to locate said flat panel display; and optionally at least one stopping frame to prevent said flat panel display from releasing.
